

Regenerative-Amplification Override Check: Does no_load_span_override
Recover a Usable Prediction Where the Old Cap Gives a Hard Qc=0?

Span Reach: Old Cap vs. 1-D Model vs. Reality
(bar at "actual span" not reached by the 1-D cap = still infeasible)

COP Recovered by the Override
(% label = model error vs. literature)
Still infeasible: Risoe_DTU_Gd_2011
