

Does ANY Solid-State Caloric Technology Beat This Repo's Own VCC COP?
Honest answer: only one measured device (electocaloric, 20.9K, 2.1W) — everything else is simulation, projection, or loses

Literature Claims vs. This Repo's VCC
(hatched = simulation/projection/vendor claim, not a measured device)

Physics-Model Span Sweep
(this repo's own literature-calibrated models, same grid as comparison_table.csv)
